

## ❖ Creative Writing Collaborative: Users contributes to ongoing collaborative storytelling projects.

### **Steps: The following step to upload a Repository to Github via Gitbase.**

Step 1: Install Git.

Step 2: Configure Git (only needed once)

Base code or Git terminal: we can follow any one

- I create the repository by git bash:
- Git config - global user.name "Riddhi-2301031000069"
- Git config-global user. email

[riddhipatel61456145@gmail.com](mailto:riddhipatel61456145@gmail.com)

Step 3: Create a repository on Github :

- First I log in to Github.
- Click on "New Repository" and give it a name.
- Keep it public or private , here I keep public.

Step 4: Go to project folder:

Open the terminal and navigate to the folder containing your files:

Base code = cd..

Cd 2301031000069

Step 5: Initialize Git: (Create a new local repository )

Base code = git init 2301031000069

Step 6: Create the assignment folders:

```
Base code = mkdir Assignment_1  
            mkdir Assignment_2
```

Step 7: Add the folder to Git:

```
Base code= git add Assignment_1 and Assignment_2
```

Step 8: Commit the changes:

```
Bash code = git commit -m "Added Assignment_1 and  
Assignment_2 foldres".
```

Step 9: Push the Changes to Github:

```
Bash code = git push -u origin master
```
